RELEVANT SKILLS

Information Architecture
Proven ability to design Information Architecture diagrams for projects ranging from concept design for strategic dot-com launches through detailed wireframes implemented on complex technical architectures.

Understanding of technology back-ends and multiple programming languages enables precise communication with tech teams.

Graphic Design
Responsible for the graphic design and design direction for multiple commercial projects.

Ability to create branding and visual style guidelines.

Practice Development
As User Experience Lead in New Delhi, responsibilities included defining the vision and strategy for the group. This included the definition of hiring targets, assistance with project staffing, and creation of mentorship programmes for junior team members.

Team Leadership
Led multidisciplinary creative teams from initial planning and concept stages of a project through final implementation.

Project Management
Have acted in the role of Project Manager on mid-sized projects including Virgin Mobile and Vielife. Responsibilities as Creative Lead included working closely with the Programme Manager to define project timelines, high/mid/low-level plans and staffing requirements.
